

Video QA

Q: What is the first animal to appear on stage?

Planner: Let me check details.

Tool call: `frame_inspect(0,120)`

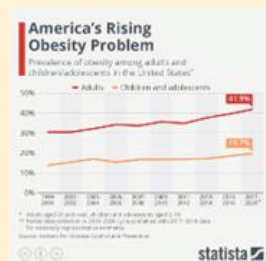

Reasoner: The frame shows a **dog**. `<answer>dog</answer>`

Error Agent: Reasoner
Error Type: Perception

Image QA

Q: When do adults with obesity show steady increase?

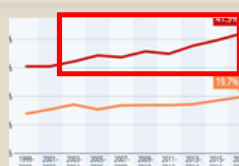

Planner: I should locate the relevant data.

Tool call: `extract_data()`

Grounder: I have located the line for adults.

Reasoner: Looking at the cropped line, **2001-2020 shows steady increase**.

Error Agent: Reasoner
Error Type: Perception

Coding

Q: Write a function that parses JSON string and returns a DataFrame.

Architect

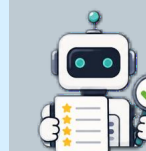

Here is the SOP: ...

Always return
`pd.DataFrame()` rather than
raising any error.

Engineer

```
python
try: ...
except:
    return DataFrame()
...
```

Reviewer

LGTM. Approved!
